Work experience

August 2021 ->

University of Oslo

PhD in Political Science. The project relates to how to conceptualize and quantitatively measure depoliticization. I also hold courses in statistics and R, and I am course convenor for the interdisciplinary course Political Data Science Hackathon.

May 2019 ->

Statistics Norway

Senior executive. Part time from August 2021. Worked on statistics on research and development until July 2021. I have held several courses in R, and led the department Innovation Team from August 2020 until July 2021. From August 2021 I provide assistance in machine learning and data science.

February 2018 - January 2019

Cappelen Damm

Freelance. Tasks include revising a textbook in the high school subject "Politics and Human Rights" and build/expand on the webpage with learning resources associated with the book.

February 2017 - May 2019

University of Oslo

Research assistant at the research project DEEPI. Tasks include collecting data to the V-Dem database, and to locate, recruit and remain in email correspondence with researchers and experts with relevant fields.

Education

August 2016 - May 2018

University of Oslo

Master's degree in political science. My master's thesis investigated the effect of financialization on income inequality, and whether labor unions could modify this effect. Quantitative method with use of the statistical program R.

August 2013 - May 2016

University of Oslo

Bachelor's degree in political science with extension in social economics.

August 2012 - June 2013

NTNU Trondheim

One year program in English.
